

BEVERLY HILLS CAR CLUB

Homepage Design Brief

Each section below corresponds to the accompanying wireframes. The brief specifies content, hierarchy, functional requirements, copy direction, and design intent. It does not specify final visual details - typography, exact colors, and component styling. The overall intent is to modernize the current look, instilling the classic, elegant brand identity. Placeholder images for hero and Alex will likely change, other images can be sourced from the website, otherwise please add placeholder or lorem ipsum where needed.

Wireframe ref	Desktop and mobile wireframes attached — use as structural reference, not visual spec
Design direction	Light / off-white base · editorial · sophisticated · full-width · less busy
Brand identity	"Beverly Hills Car Club by Alex Manos" — personal brand integrated into site identity
Deliverables expected	Desktop comp (1440px wide) · mobile comp (390px wide)
Reference sites	https://sigovs.github.io/prestige-website/index_5.html https://www.superiormotors.us/ https://www.gallery-aaldering.com/

A. Design parameters

Palette

Base	Off-white — warm, not cool. Suggest #FAF9F6 or similar. Not pure white (#FFFFFF).
Accent	Gold, champagne, or warm charcoal. Avoid primary red, blue, or green.
Text	Near-black — warm dark (e.g. #1A1A18). Not flat black.
Section differentiation	Alternate between off-white base and a slightly warmer/cooler tint (e.g. #F2F0EB) to separate sections without hard borders. Avoid heavy ruled lines between sections.

Typography

Headline font	Serif — editorial weight. Suggested: Cormorant Garamond, Freight Display, or Canela. Free via Google Fonts preferred (Cormorant Garamond is free and excellent for this brand).
Body / UI font	Clean sans-serif. Suggested: Inter, DM Sans, or similar. Must pair cleanly with the serif headline.

Hierarchy	Strong weight/size contrast is essential. H1 should feel significantly larger and lighter-weight than H2. Body text should feel refined and unhurried — generous line-height (1.7+).
Do not use	System fonts · Roboto · Open Sans · anything that reads as generic or corporate
Case	Sentence case for all headlines and CTAs. Avoid all-caps except for small labels/eyebrow text.

Photography & imagery

Approach	Image-first design — photography is the primary visual element, not decoration. Sections should be built around the imagery, not the reverse.
Treatment	Full-bleed where possible. Generous margins around images. Avoid tight crops that cut into subjects.
Overlay text	When text sits over photography (hero), use a subtle gradient or semi-transparent treatment — not a heavy dark overlay. Text must be legible but image must remain the dominant visual.
Placeholder approach	In comps, use placeholder imagery proportioned correctly (e.g. 16:9 for hero, square for inventory cards).

B. Homepage sections — specification

Each section below maps to a numbered block in the wireframe. Sections are listed top to bottom as they appear on the page.

01 Header Persistent · desktop + mobile

Height	Desktop: ~72px. Mobile: ~60px.
Logo / identity	"Beverly Hills Car Club by Alex Manos" — use existing logo asset. Left-aligned on desktop. Centered on mobile.
Nav items (desktop)	Inventory · Sell Your Car · About · Blog · How To Buy · Contact — single horizontal row, right-aligned
Primary CTAs (desktop)	Two buttons in header: "Browse Cars" (primary) and "Sell Your Car" (secondary outline) — rightmost elements
Phone	Phone number (310) 975-0272 — visible in header at desktop. Icon + number. Links to tel:.
Mobile	Logo centered. Hamburger menu left. Phone icon right.
Removed vs. current	Social icons removed from header. Language switcher removed from header. Email alerts and phone stay in header.
Sticky behavior	Header sticks to top on scroll. May reduce height slightly on scroll (shrink animation optional).

Background	Off-white (matches page base). Subtle bottom border or drop shadow on scroll only.
------------	--

02 Hero — full-bleed video Full viewport width · ~85–100vh

Background	Looping video (MP4, muted, autoplay) — footage to be provided by BHCC social/content team. Fallback: high-resolution still photograph from the video poster frame.
Video treatment	Subtle dark gradient overlay — heavier at center where text sits, lighter at edges. Video should remain visible and atmospheric, not washed out. Suggest linear-gradient overlay: <code>rgba(0,0,0,0.25) to rgba(0,0,0,0.45)</code> centered.
Headline	"Beverly Hills Car Club by Alex Manos" — large serif (H1). White. Centered.
Subheadline	One line: "The world's largest dealer of European and American classic cars." White, lighter weight, smaller than headline. Centered.
CTA 1 (primary)	"Browse Inventory" — ghost button (white outline, white text). Floating over video. Left of center in pair.
CTA 2 (secondary)	"Sell Your Classic" — ghost button (white outline, white text, slightly lower opacity). Right of center in pair.
CTA layout	Two buttons side-by-side, centered beneath subheadline. ~12–16px gap between buttons. Primary slightly larger or bolder than secondary.
Mobile adaptation	CTAs stack vertically, full width. Primary on top, secondary below. Text scale adjusted.
Video asset	To be delivered by content team
Height	Desktop: 85–100vh (fills the screen without requiring a scroll). Mobile: 70vh minimum.

03 Search / browse bar Directly below hero · full-width

Background	Off-white base. Sits as a distinct band between hero and inventory — not floating over the hero.
Search input	Single keyword text input — "Search by make, model, year..." placeholder. Magnifying glass icon left inside field. Search button right of field.
Browse all link	"Browse all inventory →" text link — right-aligned, adjacent to search bar. Links to <code>/inventory.htm</code> .
Layout	Search bar and "Browse all" link on the same horizontal line, centered within content max-width.
Mobile	Search bar full-width. "Browse all" link below, centered.
Height	Desktop: ~80px section. Compact — this is a utility band, not a feature section.
Removed vs. current	Make/Model dropdown removed. "My Garage" icon removed. "Alerts!" link removed. Recently Viewed removed.

04 Featured inventory

Core buyer section

Headline	"Featured Classics"
Layout	3-column grid at desktop. 1-column at mobile.
Card count	6 cards total (2 rows of 3 on desktop). Ownership will curate selection.
Card anatomy	Full-bleed vehicle photograph (16:9 or 3:2 ratio) · Year + Make + Model (serif, prominent) · Price · subtle hover state (slight scale or overlay with "View Details")
Card style	Minimal — no heavy card borders or shadows. Let photography carry the weight. Generous white space between cards.
Section CTA	"View all inventory" text link or small button — below the grid, centered.
Mobile	Single column. Full-width cards. Same card anatomy.
Background	Off-white base — same as page base or very slight tint to differentiate from adjacent sections.

05 Alex Manos editorial

Trust anchor · full-width

Layout	Full-width section. Two-column at desktop: large photograph left (~45% width), text right. Single column at mobile (photo above text).
Background	Slightly warmer or darker off-white tint to differentiate from inventory section above and sell section below. Perhaps a subtle warm paper texture.
Photograph	Alex Manos: Full-height within the section. Slight warm grade.
Eyebrow text	Small serif label above headline: "Alex Manos, Founder" — sentence case, letter-spaced
Headline	"I've been buying and selling the world's finest automobiles for over 20 years." Large serif. 2–3 lines maximum.
Body copy	2–3 sentences max. Lorem Ipsum. Personal, first-person voice. Ends with a link: "Read Alex's story →"
CTA	No hard CTA button in this section — the tone is editorial, not transactional. "Read Alex's story →" text link is sufficient.
Mobile	Photo full-width at top of section. Text below. Maintain generous padding.

06 Sell your car

~40% weight vs. buyer sections

Layout	Full-width section. Single centered text column with CTA. Or two-column: headline/copy left, CTA/contact right.
Background	Darker background recommended to visually separate from the off-white sections above and below — warm charcoal or dark neutral. White text.
Headline	"We buy classic cars." — short, declarative, serif.

Sub-copy	1–2 lines: "Any Condition. Nationwide. Immediate payment." — existing bullet points distilled into one or two clean lines.
Primary CTA	"Sell Today" button — primary style (solid, white text on dark button, or inverse).
Secondary contact	Phone number visible: (310) 975-0272. Small, beneath the CTA button.
Credibility detail	"365 days a year · Pickup anywhere in the USA · We pay finder's fees" — small type, restrained.
Mobile	Stacked. Full-width CTA button. Phone below.

07 Testimonials + press Trust section

Layout	Two-part section: testimonial quotes above, press logo row below.
Background	Off-white or very light tint. Different from the sell section above.
Testimonials	Current quotes, single-column carousel. (note: a single carousel likely works for quotes versus the wireframe's columns/stacking of quotes). Each card: quote text (italic serif), attribution (name, location or source). No star ratings or profile photos needed — keep it editorial.
Quote sources	Mix of press and customer quotes from Wordpress backend.
Press logos	Row of press/media logos below the quote cards — horizontal, centered, monochrome (grayscale or dark). Logos separated by generous spacing. Suggested: Google Local Business reviews/stars, Yelp reviews/stars, Hemmings, The Hollywood Reporter, Total 911 Magazine, Ebay
Section headline	Optional eyebrow: "What they're saying" — small, letter-spaced, above the quote grid.
Mobile	Quotes stack single column. Press logos wrap to 2-per-row or horizontal scroll.

08 Blog / Car Tales preview Content + SEO section

Layout	3-column card grid at desktop. 1-column at mobile.
Card count	Most recent 'Car Tales' post + 2 most recent posts — auto-populated from WordPress blog.
Card anatomy	Featured image (16:9) · Post date · Post title (serif) · 1-line excerpt · "Read more →" text link
Section headline	"From our blog" — small serif label above the grid. "See all articles →" right-aligned link on same row.
Background	Off-white base. Same or near-same as inventory section above.
Mobile	Single column stack. Full-width card images.
Image treatment	Featured images should be displayed at full card width — current site uses very small thumbnails. Design should assume full-width card-level photography.

09 Footer

Expanded vs. current

Background	Dark — warm charcoal or near-black. White and mid-gray text.
Layout	4-column grid at desktop. Stacked at mobile.
Column 1 — Brand	Logo (white version) · 2-line about statement · "Read more" link · Business hours (Mon–Fri 8–6, Sat 10–5, Sun closed)
Column 2 — Explore	Nav overflow: Inventory · New Arrivals · Coming Soon · Sale Specials · Right-Hand Drive · Sold Inventory · Rentals
Column 3 — Company	Sell Your Car · About BHCC · Alex Manos · Testimonials · Careers · BHCC Store · How To Buy · Shipping · FAQs · Buy with Crypto
Column 4 — Connect	Phone: (310) 975-0272 · Email link · Social icons (Facebook, YouTube, Twitter, Instagram, Pinterest, LinkedIn) with labels · Language switcher dropdown · "Get email alerts" signup link
Email signup	Simple one-line email input + "Subscribe" button — compact, within Column 4 or as a full-width band directly above the main footer columns.
Bottom bar	Thin dark bar below columns: Copyright © Beverly Hills Car Club · Privacy Policy · Terms · Powered by All Auto Network
Mobile	Columns collapse to accordions (tap to expand). Social icons and language switcher always visible, not hidden in accordion.
Moved from header	Social icons · Language switcher · Email alerts CTA — all now live exclusively in footer.
